15 MILE CREEK

Learning Programs

Back to 15 Mile Creek & Beyond

Back to 15 Mile Creek & Beyond

This learning branch gives students the opportunity to re-visit 15 Mile Creek and participate in programs designed to extend the learning of students who have been a part of a 15 Mile Creek program in the past.

Back to 15 Mile Creek & Beyond programs may either be conducted onsite, offsite or a combination of both.

These are enrichment programs which build on knowledge, understandings and skills from previous visits to 15 Mile Creek. These programs run once a semester and are accessed via a student application process.

Programs include:

- Expeditions and adventurous journeys to unique places
- Physical development of the 15 Mile Creek site (in line with the school masterplan)
- Sustainability projects with partner organisations at other locations within our school community

Students will:

- Build purposeful relationships with the environment, others and themselves
- Be exposed to challenging physical, social and emotional situations that will promote personal growth
- Form new relationships with other students from different places and backgrounds that share a common interest in the outdoor environment

- Make a positive and valuable contribution to the ongoing growth and development of 15 Mile Creek

Learning activities used to explore the themes within this learning branch can be adapted to suit students across a range of learning stages.

Programs developed around the Back to 15 Mile Creek and Beyond learning branch are suitable for students in AusVELS levels 5-8: Building Breadth & Depth & 9-10: Developing Pathways.

Certain Back to 15 Mile Creek and Beyond Programs are also aimed at VCE students.
